

ABN AMRO Clearing able to offer DMA services for CME Globex and Nasdaq OMX Nordic via Sol-3

17 November 2011

ABN AMRO Clearing (AAC) and Sol-3 announced today that they are now able to offer client's access to CME Globex and the equity and derivative segment of the Nasdaq OMX Nordic exchanges (Stockholm, Helsinki and Copenhagen).

Trading companies can use the Sol-3 trading front-end in combination with AAC's Global Market Access services either using their own membership(s) for access to these markets or use the membership(s) of AAC. Access to these markets via SOL-3 is offered via a fully redundant set-up operated out of two data centres in London and Frankfurt.

Sven Diepenbach, Senior Market Access Business Development Manager at AAC says: "Adding CME Globex and the Nasdaq OMX Nordic exchanges to the markets covered on SOL-3 is a big achievement for both SOL-3 and AAC especially since it comes only months after adding the U.S. Equity markets on SOL-3". "Our client base using SOL-3 can significantly benefit from these recent additions, essentially making sure that they now have access the most important equity and derivative markets in Europe and North America".

The *Sol-3 Trader* platform is a reliable, sophisticated trading tool for stock-traders, derivative-traders and market-makers including automated trading machines for quoting, opportunity trading, hedging, spreading or algo-trading. The *Sol-3 Trader* provides connections to the most important European and U.S. markets like; Deutsche Börse (Eurex and Xetra including EBS and ETS), NYSE Euronext (cash and derivatives), London Stock Exchange, SIX Swiss Exchange, NYSE, Nasdaq, ARCA, CME, Xontro, Scoach and MTFs (Chi-X, Bats Europe).

ABN AMRO Clearing

ABN AMRO Clearing Bank N.V. a world leading third-party independent clearer, has offered Market Access (MA) services from the day the first trading floors went electronic. Today's services are extensive, ranging from access via Independent Software Vendors (ISV's) own trading applications to proximity and colocation hosting services for members and non members alike.

Our global network covers the far corners of the world from Sydney to Tokyo, Singapore and Hong Kong, to Frankfurt, London, Amsterdam, Chicago and New York. ABN AMRO has an array of around 24 data centres worldwide, chosen for their proximity or colocation to important exchanges, and available for client/member hosting services.

Via the ABN AMRO low latency high capacity global network, ABN AMRO is able to offer bandwidth for clients to route orders across the globe, or use any one of around 15 ISV's it deploys round the globe.

ABN AMRO Clearing is a registered Application Service Provider (ASP) where necessary (or the equivalent) at many exchanges around the globe, and offers direct or indirect connectivity to around 45 of the worlds Equity and Derivative exchanges. Our strategy of freedom of choice with our MA services has allowed us to grow into one of the largest service providers in the world for Algo, Automated and proprietary and institutional trader
