

Sol-3 Dash FIX Integration – Direct U.S. Market Access for Professional Traders

Sol-3's new FIX interface with Dash Financial Technologies provides professional traders, market makers, and algorithmic trading desks seamless and efficient access to major U.S. equity and derivatives markets, enabling significant enhancements in trading profitability, operational efficiency, and market reach.

Key Benefits at a Glance:

- **Direct Market Access:** Immediate DMA connectivity to key U.S. exchanges, initially focusing on SPX and VIX index options at CBOE US, with further markets available upon request, including Nasdaq, ARCA, BATS, EDGX, BOX, and MIAX.
- **Advanced Execution Capabilities:** Utilize Dash's industry-leading SENSOR and IMPROVE algorithms to optimize order executions, reduce transaction costs, and improve trading outcomes.
- **Extended Trading Hours:** Fully supported trading across all CBOE sessions—Regular Trading Hours (RTH), Global Trading Hours (GTH), and Curb—providing strategic advantages, particularly for European-based traders.
- **High-Speed & Reliable Performance:** Benefit from Sol-3's robust and scalable trading infrastructure combined with Dash's proven FIX 4.2 technology for fast, accurate, and reliable execution.

Already Proven in Production:

The integration is fully operational and delivering immediate results in real-world scenarios, with clients actively trading and benefiting from enhanced execution quality, lower operational costs, and superior trading efficiency.
